## Read the paragraph. Find the text and answer the questions.

Most plants have seeds. Seeds often travel to faraway places. If seeds did not travel, too many plants would grow in one place. It would be very crowded. Some seeds travel on the wind. Some seeds travel in the water. Many seeds travel inside fruits. In many ways, the fruit is like a suitcase for the seeds as it protects them on their trip.

1.	How do seeds	ravel?	

- 2. What does a fruit do for seeds? \_\_\_\_\_
- 3. Which fruit do you like best?
