**Read the paragraph. Find the text and answer the questions.**

For centuries, the pyramids of Giza have been timeless symbols of Egyptian culture. Built by ordinary Egyptians, it took around eighty years to build the pyramids. Thousands of people were involved in completing this mammoth task. Workers had different roles. Some dug up rock, whilst others shaped stone into enormous blocks. To complete these ancient structures, workers often competed in different teams in order to do a faster job.

1. How long did it take to complete the pyramids? \_\_\_\_\_
2. Where are the pyramids? \_\_\_\_\_
